

Note: These Rules May be Subject to Further
Revision Prior to Tournament Start

2025 HAWAII MARLIN TOURNAMENT SERIES GENERAL TOURNAMENT RULES

Section 1.0 Who May Enter

Who is allowed to enter is determined at the sole discretion of The Series owner(s). These are privately owned events and we reserve the right to refuse entry to anyone, for any reason.

Section 1.01 Check In, Check Out

Once your team has paid at least the base entry, the day before the tournament you will be given a code and a link to a secure web page where you can watch the tournament spreadsheet populate with entries, - from wherever you are - just as if you were at the Club House watching in person. You can make changes, shifts, additions or subtractions by phone or text, as well as in person.

We have a Self Check-In Station on the homepage of the website where you can get all the tournament paperwork you need. All forms and rules can be downloaded off the website and printed. If you would like to pick up a Team Kit printed by HMTS staff, you can do so on the afternoon before Day One of Fishing, or swing by the Fuel Dock prior to Start Fishing Day One. Please advise HMTS Staff which process you choose!

Section 1.02 Fishing Hours

7:00AM to 4:00PM (*unless otherwise noted in the rules of each individual tournament*).

Section 1.03 Start Fishing

In 2025, all fishing will commence with a shotgun start, on all fishing days. Teams line up from the Green Buoy to the north, no deeper than 100 fathoms. Start fishing will be called on the radio at 7:00AM, unless otherwise specified.

All live bait must be caught during fishing hours, on tournament days, and a team may only use live baits caught on the same day they were caught. All lines must be in boat prior to/up until, start fishing is called.

All boats must start the fishing day from Honokohau Harbor and return each evening. All boats must check in with tournament control by radio when "On the Line" each morning.

Stop Fishing, Qualifying Catches

Boats must "Secure" at the end of the day. A boat may "Secure" prior to actual arrival at the harbor, but from the time that they announce that they are "Secure", they are holoholo (Hawaiian for "on your own). Teams with fish on board or tags to qualify may not fish after the call of "stop fishing" and must proceed directly to the Fuel Dock for the qualification process.

All fish, fish catch reports and tag cards must be checked in *by boat*, at the Fuel Dock, unless advance arrangements are made with the tournament director.

Teams with no potential qualifying fish on board nor any tags to qualify may not fish after "stop fishing" is called. Nothing caught after the call of "stop fishing" will have a bearing on any tournament, however.

Teams with fish to weigh - at the Fuel Dock scale

Once a team has tied up their boat securely to the fuel dock, tournament staff will toss the crew a tail rope, after it has been used to zero out the scale. No one shall cause the tail rope to be sprayed with water soak in water or get wet. Crew shall hook the scale hook to the tail rope as soon as the tail rope is secure on the fish. All team members shall remain on the boat until invited on to the Fuel Dock by

tournament officials to witness the official weight and/or take photos, etc. Provided that the weigh master approves the process of preparing the fish and scale, *each individual fish will be weighed only once.*

Section 1.04 Fishing Area

The “Fishing Area” map is for reference and aid in providing your general location to tournament control radio. You are not restricted to fishing within its boundaries. You can fish wherever you want, *provided you fish no further than 45 miles from the mouth of Honokohau Harbor - and - you leave from and return to Honokohau Harbor each day.* If you are near the 45-mile limit - or - outside the published grid, you are in The Deep End so capture photo or video evidence of a GPS fix and identify the lat. long. as well as the nearest grid during the radio roundups. If you hook a fish and it takes you outside of 45 miles from the mouth of Honokohau Harbor, you may fight it to its conclusion, wherever the fight takes you. You can resume fishing once you are back within the 45-mile limit - *only* - after that specific fight ends.

Section 1.05 Radio and Tournament Control

Tournament Control will be on VHF Channel 68, unless otherwise announced.

Section 1.06 Radio Roundups

Radio roundups will be conducted at 10:00 AM, 12:00 PM and 3:00 PM on every day of fishing. When Tournament Control calls for your team to report, you must call in your Team Number, Area & Fish Catch Report. Refer to your grid map if you are unsure of which area you are fishing.

Section 1.07 Radio Conformation

All hook ups, losses of fish, captures of fish and tag and releases must be confirmed by tournament control radio. If confirmation from Tournament Control is not possible due to distance or radio failure, a confirmation must be made via relay. If you know you will be fishing out of radio range, or know that you are having radio problems, it is your responsibility to organize a buddy to radio relays for you.

See also **Section 1.09 Cell Phone** for extenuating circumstance exceptions.

Any fish that has been tagged or boated that tournament control has not confirmed will not be allowed to qualify in any manner. Confirmation is the responsibility of the teams.

Section 1.08 Estimated Weight and Short Length

Every team that boats a marlin must call in the short length within 15 minutes of boating the fish.

Section 1.09 Cell Phone

Cell phone hook up/catch/loss/tag reports must be called to another boat and relayed to Tournament Control by VHF radio.

If a relay is just not possible due to time constraints or range, you can text or call tournament control at 561-267-2674. Text is preferred for written time stamp. Cell phone calls and texts are not accepted for reporting a fish catch, tag or loss unless a radio call or radio relay is simply not possible. ***This is allowed only in extenuating circumstances and is not to be employed as a daily or day long strategy.***

Once you can radio or get a relay, reconfirm your report(s) by radio. The intent of this section is to keep the entire tournament fleet in communication for transparency. Communication is also necessary for Control to give Video Confirmation Instructions. If you choose to fish out of communication range and you tag marlin(s) and do not get the specific video confirmation instructions for each fish, the tags will not count.

Section 1.10 Multiple Hook Ups

Multiple hook ups must be reported to Tournament Control immediately upon realization that there are multiple fish hooked up. Specific Video will be required to verify a multiple fish hookup. Failure to report or produce the proper Video can be grounds for disqualification.

Section 1.11 Dock Time

All boats with fish to weigh and/or tag cards to turn in, must be inside Honokohau Harbor by 6:00 PM. If you are not inside the line drawn from the green and red Honokohau port entrance lights by 6:00 PM, your catch will not qualify. It's that simple.

Section 1.12 Late Weigh Ins

If you hooked up prior to the call of "Stop Fishing" at 4:00 PM, you may fight your fish until you catch it. If it is apparent that you will miss the dock time because you are still hooked up, Tournament Control must be notified to make the necessary arrangements.

If there are fish on board that you boated prior to the call of "Stop Fishing" at 4:00 PM, and you hook up prior to the call of "Stop Fishing" but do not land that fish(es), your first fish(es) will still count and you will be exempt from dock time, provided that Tournament Control was properly notified.

Any falsification of a hookup to be exempt from dock time is grounds for disqualification and possible ejection from the tournament.

Section 1.13 Disposition of Fish

Disposition of fish at the dock is 100% the responsibility of the teams. Fish must NOT be left at the dock, or they will be confiscated - and eaten.

Section 1.14 Registered Crew

Each team must register one captain and up to two crew. Captains and crew can be registered as anglers.

Please note: Four anglers are the max per team included with the base entry. More may be added for an additional registration and hospitality fee.

Section 1.15 Registered Anglers

Any participant who wishes to weigh a fish for qualification or turn in a tag card must be listed on the registration form as an angler. Non-registered guests are welcome on board to ride along, BUT only registered anglers can angle a fish for qualification in the tournament. Substitute anglers are allowed, but they must be called in prior to "Start Fishing" of that day to Tournament Control.

Section 1.16 Definition of Team

A team is defined as a maximum of four (4) anglers and one (1) captain and two (2) crew in relation to the Team Entry Fee. Personnel can be added. (see sec. 1.14)

Section 1.17 Minimum Weight

No awards will be given to any fish that weighs in under the minimum weight specified in the specific rules of that tournament.

Section 2.0 Angling Rules

Section 2.01 Angling Rules

International Game Fishing Association (IGFA) Angling Rules For Fresh and Saltwater strictly apply. IGFA angling rules can be found in each team kit.

NOTE: IGFA “Release Rules” do NOT apply and are not incorporated into the HMT Series General Rules or associated individual Event Rules.

Section 2.02 Fishing Line Requirements

130-pound (60kg) line class maximum for a “front.” See the IGFA rules in your team kit for specifics. No bonus points for lighter line. Tackle will be inspected with every fish weighed and tagged. Lines may be tested at the discretion of the judges.

IGFA has adopted the following, until further notice:

Equipment Regulations

A. LINE & BACKING

1. Monofilament, multifilament, and lead core multifilament lines may be used. For line classes, see World Record Requirements.
2. Wire lines are prohibited.
3. The use of backing is permissible.
4. The catch shall be classified under the breaking strength of the first 16.5 feet (5 meters) of line directly preceding the double line, leader, or hook. This section must be comprised of a single, homogenous piece of line.

Section 2.03 Terminal Tackle

Terminal tackle must be tied in conformance with IGFA specifications. Mis-tied terminal tackle is not considered non-conforming gear but will result in the disqualification of the specific catch being judged at that time only.

Only circle hooks may be used for live and or dead bait fishing. No “J” hooks with natural baits.

Section 2.04 Re-Use of Lures

A lure may be re-used after a capture only if this method is strictly adhered to: Cut the leader approximately 12 inches up from the eye of the front hook. Save the hook(s) with the 12 inches of leader attached. Save the long piece of leader also. Present both pieces to the judge along with your lure, tackle and fish or tag card. Cuts, scrapes and scratches that do not match on the two pieces of leader can be grounds for disqualification. Once the leader is cut, the hook set cannot be reused, only the lure. The hook set and leader must be presented as described above or your fish will be disqualified.

Section 2.05 Non-Conforming and/or Illegal Fishing Gear

Any non-conforming gear, on board, used or not used, is ground for disqualification. Remove all hand lines, long lines, purse seines, drift gill nets, slide gaffs, harpoons, commercial fishing gear, bombs, guns, gang hooks, etc. Green stick rigs: The green stick itself can be left on board, but remove the bird and the reel from the boat. Teams must abide by all USA, State, County and Municipal laws, as well as abide by applicable fishery rules, regulations and definitions (including illegal fishing gear) of USA, State, County, Municipal and/or of any fishery agreement or treaty that the USA is signatory to and/or member thereof.

Section 2.06 Transfer of Stuff

After the call of start fishing, there shall be no transfer of “stuff” between tournament boats *On The Playing Field*– including but not limited to – bait, tackle, caught fish, mechanical supplies and/or personnel - except in case of emergency.

A request to use a replacement boat must be made to Tournament Control prior to the transfer of any stuff or personnel between boats, whether at sea or in the harbor. A team may return to the harbor to pick up “stuff”, and/or people, and/or to change boats, if needed. Any boat returning to the harbor for any reason

must notify control on the way in, and when they are back on “the line.” Tournament Control may require an inspection of one or both boats prior to the time that the request to use a replacement boat is granted.

Section 2.07 Tag Poles

Tag poles shall be no longer than 8 feet overall. Tag poles will be measured. Telescoping tag poles that extend beyond 8 feet long will be considered non-conforming gear.

Section 2.08 Tagging and/or Gaffing

The act of tagging a fish is the demarcation needed to claim a fish as tagged and to be submitted for qualification as a tagged fish. Video evidence is required showing the tag in the marlin.

A fish may be tagged and then observed to determine if the fish is better than 400 pounds. Should that marlin be lost during said observation period, the tag points will still apply to the team score, provided that sufficient video evidence is still obtained.

However, no team may “boat” a fish and then tag and release it. “Boating” a fish includes pulling the fish into, or part way into the cockpit. If a fish is boated in any manner – with or without a gaff - it must be kept and brought to the scales. If a marlin is ‘boated’ and then pushed back into the ocean for any reason, the team shall receive zero points for that fish.

The intent of tagging is that the fish is handled and released in a manner that maximizes the chance that it will survive the tag and release. Attempts to calm the fish with an “attitude adjustment” bat or “donga” shall also result in a forfeiture of tag points for that fish.

Should the team decide that the fish is large enough to be taken, the fish may be gaffed. At the point that a gaff touches a fish, the tag points are lost. Should the fish subsequently be lost after a gaff touches the fish, all points are lost. You must be hooked to a fish at time of tagging or gaffing. No free tagging or free gaffing is allowed. All fish must be hooked at time of tagging or gaffing.

Section 2.09 Birds

Birds and/or any sort of float or other device that may unfairly hamper or inhibit the normal swimming or fighting ability of the fish are not allowed to be attached to the fishing line or any segment of terminal tackle. Birds may be used as teasers, as may dredges, daisy chains, mud flaps or any other “teaser” so long as they are not attached to any part of the fishing line or terminal tackle.

Section 3.0 Tag and Release Requirements

NOTE: IGFA “RELEASE RULES” DO NOT APPLY!

Section 3.01 Video

All marlin tagged and released must be evidenced on Video to qualify. Teams may use their own video devices, provided they can digitally transfer the video to Tournament Control. Video presented dockside on personal devices may be accepted on a case-by-case scenario. Judge’s decision is final.

Teams may no longer use a Tournament Camera provided by HMTS Staff. *They died.* No video – no money. Always video with multiple devices to ensure you get your video and your points! Video must verify (1) species of the marlin, (2) that the tagging procedure was completed, (3) that multiple hookups were actually being fought when so reported, (4) the marlin swims away free at the conclusion of the process and, (5). the unique hand signal assigned by tournament control radio to each individual fish.

Release videos may be submitted via text message or WhatsApp to Tournament Director Lacey Hagler at 561-267-2674, included with boat name, angler name, species, radio release time, and grid area.

Any release photos or videos posted to tournament website, social media, or CatchStat are for entertainment and marketing purposes only and may not reflect final verifications. Official standings and verification rulings can be obtained by contacting the tournament committee.

Section 3.02 Best Approach to Producing Video Required by Judge(s)

The best approach to getting the Video required is to take at least one sequence from the bridge with a wide view of the fish on the leader being tagged. If feasible, go down the ladder and take another sequence up close. It is recommended that you take a couple of clips from each approach, with wide, from the bridge, being the priority (if you have a bridge).

It is expressly understood that due to the nature of dealing with wild animals, and the inefficiencies of video cameras and sport fishing tackle, no procedure is fool proof, and there is always a chance that, regardless of procedure taken, the team may not capture the video images needed by the judge(s) and may be denied points based upon the lack of video and/or photographic quality and/or detail. In any event, all videos must be taken in compliance with Sections 3.01 and 3.05.

It is recommended that teams always take back up video - however - all video must meet the criteria outlined herein, as well as capture any instructions given by Tournament Radio Control during the catch process.

Section 3.03 Radio Control and Video

Tournament Control radio will give special instructions for Video that you must take during the tag and release process. Failure to capture on video the security element (usually a hand signal) assigned by tournament control can result in disqualification.

Section 3.04 Multiple Hook Ups and Tagging

Multiple Hook Ups must be reported to radio control immediately upon hookup as you will be required to take specific Video to provide evidence of all multiple hookups.

Section 3.05 Intent of These Rules

As with the IGFA Angling Rules, tournament rules are written with specific “intent” paramount. Participants should be aware that dealing with wild animals is not like dealing with a golf course, where it is plainly obvious whether a golf ball went in the hole - or not.

As an example, versions of the IGFA Angling Rules (Saltwater) state the intention that the angler shall strike and hook the fish with the rod in hand. We all know that this is not practical with 130 lb. bent butt tackle. However, I.G.F.A. recognizes this is rarely the case with heavy tackle. The IGFA’s stated intention is that the angler move the rod from the holder to the fighting position as quickly as possible.

This tournament Series *requires* that video be taken of marlin released with the intent to verify (1) species of the marlin and (2) that the tagging procedure was completed, and (3) that double headers were actually being fought when so reported, (4) that the marlin swam away freely and; (5) that the hand signal or other instruction by tournament control radio are captured on the video.

A golf ball in a hole is a golf ball in a hole, and there are no two ways about it. A video proving that the (1) through (5) were fully performed may take many forms. Therefore, it is the responsibility of the judge(s) only, to ascertain if the video provided fulfills the intent of this rule. By participating in this tournament, the teams accept this and are responsible for providing the best possible videos to the judges.

It is not the intent of this rule that teams are required to get a close-up of a tag streamer in a marlin. “Man handling” fish after tagging contributes to undue mortality. This is counter-productive to the intent of tag and release. The recommended procedure for teams to get the videos required by the judge(s) is outlined above. The decision to either follow or not follow the recommended video procedure is the choice of the teams, and the results are their responsibility – regardless of procedure employed.

The judge(s) shall be the only person(s) to interpret the videos for the purpose of rulings. A team may ask to see the videos taken from their boat only. Should the judge(s) have a problem with any particular video and/or disallow a tag and release on the grounds of insufficient videography proof of (1) through (5) above - it's the responsibility of the judge(s) to show the video to the team whose catch is being disallowed, only.

Section 4.0 Sportsmanship, Protests and Payout

Section 4.01 Sportsmanship

All judging, awarding, and accounting of purses and prizes will be handled in a business-like manner and in the spirit of good sportsmanship. No yelling or otherwise attempting to intimidate judges or officials shall be tolerated. Any abuse of judges could result in disqualification and/or ejection. We also reserve the right to refuse entry to anyone, for any reason. These are private sector events.

Section 4.02 Disqualification

Grounds for disqualification include but are not limited to: Violating tournament or HMTS General Rules, cheating in any manner, which includes but is not limited to: filling fish with water, using line "front's" heavier than 130-pound test, falsified tag video, rendering official cameras unworkable, using tag poles longer than 8 feet in length, using non-conforming gear and/or falsifying hook-ups, interfering with task of Officials, disrupting weigh ins, and/or fishing with illegal fishing gear or otherwise illegal fishing.

Disqualifications may also be ruled if/when teams or individual team members are found to be in violation of any Government law, rule or guideline (including fisheries) between the call of Start Fishing on First Fishing Day and the call of Stop Fishing on the Final Fishing Day and said violation has a direct bearing and consequence upon score(s) of the tournament. (Not traffic violations etc.)

Disqualifications may also be accompanied by Rule 1.0 expulsion.

EXAMPLE: Private Fish Aggregation Devices (FADs) that are deployed without the owner obtaining the required license, permits and/or registration with government authorities are illegal, as well as hazards to navigation. Further UNCLOS finds when FADs "contravene national or international agreements or regulations, they are Illegal, Unreported, and/or Unregulated (IUU)." In addition, FADs continue to fish illegally around the clock and thus are "illegal fishing gear" so even if an owner did get proper permits and registration, their FAD would be fishing outside of tournament fishing hours, and thus illegal. Therefore, any tournament team found guilty of owning and/or deploying a private FAD that they used to score points in an attempt to win money in any HMT Series Tournament will be disqualified and prohibited from entering any tournament in the future, per HMTS General Rule 1.0.

Further, because the tournaments in the HMT Series are bonafide "sporting contests" - as with "The illicit use of banned drugs (doping) to influence the outcome of a sporting contest, constitutes a fraud against competitors, spectators, sport, sponsors, and the public no different from other personal, professional, or commercial frauds" - the illicit ownership of illegal FADs and any other IUU or illegal fishing gear used to influence the outcome of any HMT Series sporting contest may also constitute a fraud against competitors, sport, sponsors, and the public, to which civil and criminal action and penalties may apply.

Conversely, State of Hawaii, DLNR/DOBOR staff has written that it is not illegal for any person to fish any stretch of public ocean (not otherwise closed to fishing) because another person has deployed a FAD without a license in said stretch of ocean. By analogy, motorists are not prohibited from driving any stretch of public road (not otherwise closed to driving) because another motorist is driving without a driver's license on said stretch of public road.

Section 4.03 Protests

All protests must be filed in writing by 7:00 PM on the final day of fishing. Each individual protest must be submitted along with a \$300 deposit fee. No Exceptions. At the sole discretion of the Tournament Director, a decision on any potential rule infraction *may* be referred to a Protest Committee for final decision. If referred to a Protest Committee, the decision of the Protest Committee will be final and binding upon all parties. If the grounds for protest are not found valid, the Protester shall lose the \$300 deposit. If the protest is found valid, the \$300 fee will be returned.

If officials find that a protest is vexatious, the protestor shall lose the \$300 deposit and may be ejected from the tournament and may also be subject to **Rule 1.0. Who May Enter.**

Section 4.04 Rights and Responsibilities

There are certain responsibilities inherent to, and accepted by, teams and management. Upon payment of entry fee(s) teams are, from that point forward, bound by the rules of the tournament as printed herein, and accept this responsibility.

Upon acceptance of entry fee(s) from any number of teams, management becomes responsible for scoring of the tournament, judging of catch(es) in relation to the rules printed herein, and disbursement of purse and/or refunds as determined by the outcome of the tournament.

Should a team find that there are rules in the tournament that they do not find acceptable, they may withdraw from the tournament prior to the call of start fishing on Day One of the tournament. See individual tournament rules for stipulations and refund policies for that specific event.

Once the tournament has started, the teams are bound by the rules printed herein. Violation of one or more rules is grounds for disqualification and/or ejection from the tournament.

A team may withdraw after commencement of the tournament, but all entry fees shall be forfeited and remain in the purse as per normal. Management reserves the right to deny entry to anyone.

Section 4.05 Official Results and Pay Out

Purse money shall not be distributed until all entry fees have cleared the bank.

Purse money shall not be distributed until all tournament Videos are processed and results verified. "Results" printed prior to Video verification, protest review and final tally are "Unofficial."

Notwithstanding that each team signs a Liability Release and Covenant Not to Sue Bonnier LLC - in the event of any litigation regarding prize money - the HMTS shall be entitled to its reasonable attorneys' fees and costs, to be paid out of the prize money in dispute. If the prize money in dispute is insufficient to pay the HMTS reasonable attorneys' fees and costs, each Participant in the litigation shall be jointly and severally liable to pay the HMTS reasonable attorneys' fees and cost. In no event shall the HMTS be liable to any Participant for any attorneys' fees or costs.

The Hawaii Marlin Tournament Series uses CatchStat for registration, team management, and live scoring updates. All content on CatchStat and/or social media is for entertainment purposes only. Content does not replace and may not reflect official tournament standings or payout amounts. Official standings and payout amounts can be obtained by contacting the tournament committee.

Section 4.06 Use of Polygraph

U.S. District Court Judge Richard D. Bennett of Baltimore issued a judgement in favor of the White Marlin Open and their use of polygraph evidence was a large part of the case. Therefore, at the sole discretion and decision of The Tournament, potential winners may be required to take polygraph tests. See HMT Series Polygraph Policy document for specifics.

Section 5.0 HMTS Scoring, Points and Placement

This section pertains to the overall Series points earnings and does not apply to individual tournament standings.

Section 5.01 Series Angler and Boat Scoring

All registered boats and anglers registered in a Member Tournament are automatically qualified to earn Series Points. Boats shall earn points for each Member Tournament that they fish – as individual boats — regardless of their team composition.

Series Points shall be awarded to an angler in relation to their specific catch(es), and to a boat in relation to the catch(es) caught by any participating angler, registered on that boat.

Multiple catches by members of a team in a Member Tournament shall be scored for Series Points separately – according to each individual's catches — and with no connection to the scoring of the Member Tournament.

At the end of a Member Tournament, an angler could score points for catch(es), and possibly earn placement points. Boat points are cumulative of all angler points scored on board.

In 2025 the HMT Series will ***not*** be awarding Participation Points as in years past.

Section 5.02 Rules for Qualifying Catch

All Series points are to be awarded based on catches complying with IGFA International Angling Rules only. Catches hoping to qualify for Series points must first qualify for points in the Series Member Tournament in which they are captured and/or tag and released. Should the Series Member Tournament judge(s) confirm scoring under IGFA rules, the Series judge(s) shall proceed with the processing. Rod, reel, hooks, line and terminal tackle shall be inspected at the discretion of the Series judge(s).

Section 5.03 Fish Scoring

1 Point Per Pound shall be awarded for each blue or black marlin boated. A minimum weight of 400 pounds is required to qualify for Series points, regardless of Member Tournament minimum rule.

165 Points shall be awarded to the angler and boat for each blue or black marlin tagged and released.

100 points shall be awarded to the angler and boat for each striped marlin tagged and released.

Zero points shall be awarded for spearfish or sailfish regardless of whether they are tagged or captured.

1 Point Per Pound will be awarded for each pound over 100 pounds for each Ahi weighed. Example: a 101-pound ahi will score 1 point; a 123-pound ahi will score 23 points.

Section 5.04 Event Placement Points

Event Placement scoring is awarded to the angler's catching a fish on a team that contributes to that team earning First, Second or Third Place Overall in each Member Tournament.

First, Second or Third Place Overall shall not necessarily be attributed to Member Tournament purse distribution, but to the equivalent of First through Third Total Points, or Gross Score.

Should more than one angler contribute to a catch to the Member Tournament Placement, the Series Event Placement Points shall be split evenly among the anglers catching the qualifying fish.

Should one or more fish from a Placement team be disqualified, the angler disqualified will not receive a share of the Event Placement Points unless they qualified a fish other than the one not allowed.

- 300 points gross shall be awarded to the angler(s) for a First Place Overall finish.
- 200 points gross shall be awarded to the angler(s) for a Second Place Overall finish.
- 100 points gross shall be awarded to the angler(s) for a Third Place Overall finish.

Section 6 Definitions

Section 6.01 Ahi

The Definition of “Ahi” in the HMTS, refers to Yellowfin Tuna, Bluefin Tuna and Big Eye Tuna.

Section 7 Misc.

Section 7.01 Entry fee and access to HMTS events

The entry fee for each event includes access for up to four anglers and two crew members per event entered. Additional tickets are available for family and friends. Please enquire with HMTS Staff.
